

Oregon Memorials Offers Custom Columbarium

PORTLAND,OR— If you can imagine it we can create it in stone! This is the motto of Oregon Memorials, who recently added a new product to their continually expanding line of granite offerings. Since 1947 Oregon Memorials has designed and produced markers, monuments, signs, countertops, war memorials, and special granite features all over the country. The most recent addition is a custom all granite columbarium, one of which was installed for Fern Prairie Cemetery in Camas, Washington.

These units are all custom designed with various sizes, styles, and colors to fit nearly any budget need and desire. They are constructed with all polished granite inside and out with a wide variety of colors to choose from. Even the niche size is customizable. There is no concrete or plastic in the construction making a strikingly beautiful and affordable family or community columbarium.

“We were seeing our customer's needs and hearing them talk about the rapid increase in cremation rates and the rapid decrease in niche inventory.” Tim Bronleewe President of Oregon Memorials comments... “We have been building columbariums for years and it only made sense to use our expertise and experience to develop a product that is adaptable, affordable and attainable for cemeteries and funeral homes that need additional niche inventory.”
